## MEDIUM WAVE ELECTRIC INFRARED SPACE HEATERS

Electric infrared heaters are the cleanest method of heating, taking nothing from the air and adding nothing to the air. They produce heat by running an electric current through a high-resistance element. BAH Series heaters are ideal for low output, low clearance to combustible areas and in applications where gas and/or ventilation is not available or impractical.

## SPECIFIC QUARTZ-RAY ADVANTAGES

**Savings-** A custom-tailored Quartz-Ray installation can economically meet your heating needs for new construction or retrofitted for existing facilities.

**Control-** Provides heat when you want it; where you want it.

**Ease of Installation-** Special features built into every Quartz-Ray electric heater allows ease of installation in new or existing applications.

**Comfort-** Quartz-Ray electric heaters quietly focus energy efficient infrared rays on the floor area, maintaining the required comfort levels for people while reducing the stratification effects.

**Condensation-** Potential corrosion problems with stored steel products is eliminated by keeping the temperature above the dew point.

**Noise-** No fans, blowers or moving parts reduces overall noise levels in the space.

## PRODUCT FEATURES

- Voltage inputs of 120, 208, 240 480, and 575.
- Six models available ranging from 0.5 kW to 4.0 kW.
- Pollution free - no venting required.
- Produces virtually instant heat.
- 90-Day limited warranty.
- CSA Design Certified.

## TYPICAL APPLICATIONS

- Loading Docks
- Sporting Facilities
- Shipping/Receiving
- Valet Areas
- Spot Heating
- Vestibules/Entrance Ways

### Clearance to Combustibles

Clearances to combustibles **must** be maintained. Clearances are measured from the radiant surface and/or heater bottom to the nearest combustible surface. It is essential that the position and the angle of the installation avoids any possibility of curtains, draperies or other flammable material coming in contact with the heater.

### WARNING

**To Prevent Serious Injury or Death:**

This heater is **NOT** for home or recreational use. **DO NOT USE** in the home, mobile home, RV's, campers, tents, etc.
